Summation	2
-----------	---

Summation

Secure Technology, LLC. examiner Doug White received a 1.44 MB floppy diskette, black in colour with the name Memorex branded on the diskette from Attorney Konray. A Chain of Custody document was prepared (see Appendix I, pp. **Error! Bookmark not defined.**) and a log file was begun for this evidence (see Appendix K, pp. **Error! Bookmark not defined.****Error! Reference source not found.**). The diskette was marked as evidence number 0001 for case 20082102.

In the analysis of the diskette, several key files of interest were found including a xxxxxx which was recovered from the free space on the diskette (see pp. **Error! Bookmark not defined.**) and a word document named xxxxx.doc (see pp. **Error! Bookmark not defined.**). The letter contained a letter signed by “xxxxxxx” and appears to praise someone named “xxxxx” for their actions. The letter and the spreadsheet contained metadata which indicated the licensee of the office product was xxxxx and the company name as xxxxx, Inc. Both of the documents were created on 10 – Feb – 2004.

Fragments found on the diskette in the slack and free space of the media contained several different pieces of information. This information was located in the vicinity of the spreadsheet document on the disk and contained a list with the words:

- “xxxxx” (see pp. **Error! Bookmark not defined.**)

A longer text passage was also found in this general vicinity which contained the following text:

*Last Will and Testament –
State of xxxxx – This
document is to serve as the
last will and testament of
xxxx who depose and say that
My attorney has followed my
direction and I hereby
appoint my beloved nephew
xxx as the Executor of my
estate.*

*Throughout my rich
life I have worked hard
married well and invested. I
have many friends and
relatives many who have not
always treated me good. My
beloved nephew xxxx has
a;lways (sic) been loyal and
tended to my evry(sic) need.
I hereby bequeath my entire
estate to xxxxx (see pp.
**Error! Bookmark not
defined.**)*

This would appear to constitute a last will and testament from xxxx. Again, it would appear that this document was deleted at some point but remains on the disk as an artifact.

Two passwords were recovered during the course of the investigation, “xxxx” and “xxxx”. These may prove useful in dealing with any further evidence in the case.

There are several items of interest on this media. Each of which would merit further examination in the case, several of which would generate cause for concern due to the use of words which could imply violence or a threat.

It would appear the disk contained some information which had been

deleted and then the workbook and document files were added on the same date. At that point the disk was formatted which caused the files to be inaccessible without the use of forensics methodology.

No other items of evidence were apparent on the media which was completely examined and returned to Attorney xxxxx along with this report.
